

DESCRIPTION OF
THE RADIX, 1992

VOLUME ONE: *RADIX PERSONAL GROWTH WORK* (379 pages perfectbound)
VOLUME TWO: *THE SCIENCE OF RADIX PROCESSES* (173 pages perfectbound)

by Charles R. Kelley, Ph.D.
student of Wilhelm Reich and Founder of Radix Education

This compilation of articles from various sources span thirty years of Dr. Kelley's thought about the life force and the implications it bears for personal growth, science and religion. Never before has a comprehensive collection of this work been available. Personal growth writings include the beginnings of Radix Teaching in the first published formulations of the concepts of feeling and purpose in the early 70's, through the development of technique and theory to the program Kelley/Radix now is. Of special interest are the many major articles from *The Radix Journals*, which have been out of print since 1987. The science writings span the beginnings in the Reichian movement of the early 60's and move through Kelley's divergences with Reich, his own experiments, and the in-depth explorations that appeared in *The Radix Journal* of the implications of Radix theory in physics and cosmology, the development of Radix Algebra, and applications in daily life.
